Danielle –

Here are some ideas:

Support representation of cities and counties on decisions effecting public safety

Support legislation to allow sharing of ALPR data with law enforcement agencies outside the state to further criminal investigations.

Oppose a ban on law enforcement use of ALPR devices.

Oppose a ban on law enforcement use of canines.

Support grant opportunities to enhance public safety.

Subject: Combined Public Safety Examples for Legislative Platform

Hello Chiefs-

I have sent both of you an email about the legislative platform I am building for the City with some examples for your prospective department. Some entities listed legislation that pertained to both Fire and Police (most entities list the items under the banner Public Safety, rather than identify them separately by organization.) I wanted to provide them to both in case, collectively, the two of you wanted to include them in the legislative platform.

Examples of Combined Public Safety Legislation:

*Support the fair and efficient allocation of radio spectrum that provides quality frequencies, free from interference, for all local public safety communication needs.
*Support efforts to enhance radio and data system(s) stability and interoperability

among public safety agencies and jurisdictions.
*Support activities to develop and implement statewide integrated public safety communication systems that facilitate interoperability and other shared uses of public safety spectrum with local, state and federal law enforcement, fire emergency medical and other public safety agencies.
*Support efforts to improve 911 services including, but not limited to, directing 911 emergency calls from mobile telephones to the nearest Public Safety Answering Point (PSAP).
*Support representation of cities and counties on decisions affecting 911 systems and effective emergency response.

Please let me know if you have any questions.

Thank you.
